

READ IT -- THEN DO YOUR OWN THINK.

When your new automobile does not perform to expectations, you look to the automobile factory for accountability. If your new shoes fall apart after one wearing, you look to the shoe factory for accountability.

When your children fail to develop rationally, productively, responsibly, look to the "people factories" you turned your children over to for intellectual input. These "people factories" -- any institution claiming to be in the business of programming ideas and data into your child's mental data base -- must be held accountable. But every such institution denies accountability and governments instead substitute intimidation, rules, regulations, taboos, fines, imprisonment, captivity, confiscation of assets, ad infinitum. When governments accredit institutions, all are then collectivist and exclusively in the control business -- not the "inquiry into the truth" business.

ACCREDITATION IS COLLECTIVISM. IT IS GOVERNMENT GUN CONTROLLED FORCE THAT ABSOLUTELY BLOCKS INQUIRY. IT MANDATES CONFORMITY TO ARROGANT VOCATIONAL IGNORANCE WHICH ELIMINATES THE CENTRAL ELEMENT OF HUMAN NATURE: -- INQUIRY AND FREE WILL.

WHO IS ON YOUR SIDE -- AND YOUR CHILDREN'S SIDE? -- ONLY YOU!

We are offering you "a world of help" but you are the ones who need to read and think -- and help your children to learn to read and think. Every aspect of your life -- your happiness, your wealth, your health, your intelligence, your very physical survival depends upon no one else but you. You can lead a student to school but you can't make him think. You have to love your children enough to stop protecting them from reality and in that definition of honesty, instruct them in survival procedures. It is the nature of the human.

Protecting your children from reality is not only dishonest. It is teaching them to fake reality and making a "sitting duck" victim of them should anything happen to you (and/or your protection) Your children's best insurance policy is the strength they gain by accelerating their adolescence.

Open your children's minds to all possibilities. Help them discover the nature of a value -- through their own experiences. Then help them learn to keep their mouths shut and their minds open. Consider all possibilities - the correct one will stand the test of the simple principle explained in TEXTBOOK OF AMERICANISM. This goes for decisions of the big three -- money, power and sex. Obviously other problems are all sub topics of those three prime motivators. Taking the love out of life destroys the love of life. Think about it.
